

A synergistic blend of nature's finest

Patented & Extended Absorption Time*

Dual Health Defense is REV222's homeopathic blend of olive leaf extract and oregano extract that creates a balanced approach to health. While wild oregano oil provides immediate immune defense, olive leaf extract offers long-term immune and cardiovascular support.

Our patented extraction process extends the time your body has to absorb the olive leaf extract and preserves 18 more active ingredients within the olive leaf than other products. Research shows that the combined usage of oregano and olive leaf extract provides sustained health benefits.

- Clinically-tested since 1995
- No artificial colors
- No animal byproducts
- 100% vegetable base capsules
- No animal products used
- No artificial colors
- No GMOs
- No filters

The O+O Synergy: Why Olive Leaf and Oregano are great complements

Why They Work Together:

- Wild oregano oil provides immediate immune defense.
- Olive leaf extract offers long-term immune and cardiovascular support.
- Together, they create a balanced approach to health.

Benefits of Synergy:

- Faster results due to oregano's potent compounds.
- Sustained support from olive leaf extract's ongoing action.

Scientific Backing:

- Research shows combined usage amplifies individual effects.

Features:

- High-quality, sustainably sourced ingredients.
- Free from additives, fillers, and synthetic substances.
- Packaged in environmentally friendly materials.

Benefits:

- Immune system boost.
- Antioxidant protection.
- Anti-inflammatory and cardiovascular support.

P73 Wild Oregano Extract

Source:

- Grown in high-mountain, mineral-rich soil for potency.

Key Benefits:

- Antimicrobial properties to combat harmful pathogens.
- Antioxidant protection against free radicals.
- Anti-inflammatory action for joint and muscle health.
- The P-73 formula is uniquely potent and pure.

d-Lenolate® Olive Leaf Extract

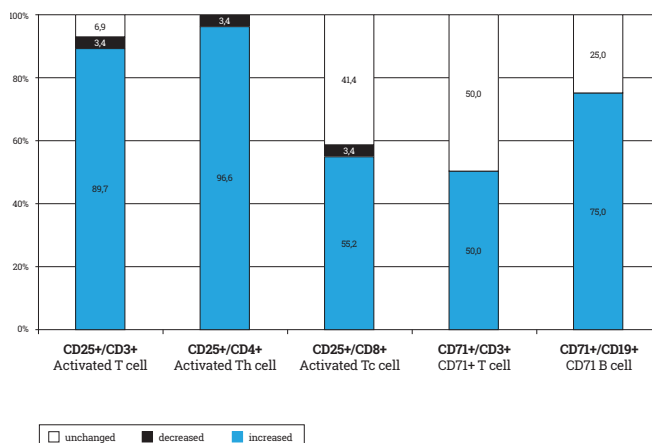

Source:

- Derived from the leaves of premium olive trees, rich in polyphenols.

Key Benefits:

- Enhances immune system functionality.
- Protects against oxidative stress with high antioxidant levels.
- Supports cardiovascular health by promoting healthy blood pressure.
- Patented d-Lenolate® /Eden formula for superior absorption.

T cells are a major component of an adaptive immune system. Roles include directly killing infected host cells, activating other immune cells, producing cytokines and regulating the immune response.

- CD25 is considered the most prominent cellular activation marker.
- CD3 is a component of our immune signal response associated with T-cell
- CD4 distinguishes T-helper cells
- CD8 distinguishes T-cytotoxic cells
- CD71 is a transferrin receptor that mediates the uptake of transferrin-iron complexes.
- CD19 establishes intrinsic B cell signaling thresholds
